

Virginia Moon White Whiskey

ABV: 45% (90 PROOF)

The Blue Ridge is home to some of the oldest distilling traditions in America, with spirits produced by local folk in local stills. Later known as “illegal moonshiners,” distillers risked jail to practice their craft, and to carry on traditions to support their family. Recognizing the spirit of this Virginian tradition, as well as remembering where we came from, we make this unaged whiskey we call Virginia Moon.

Tasting Notes

Virginia Moon has a refreshing taste due to its high wheat based mash bill. Surprisingly smooth, it can be enjoyed neat, paired with mixers, or incorporated into craft cocktails.

Fast Facts

- Virginia Moon is created entirely from scratch by KO Distilling
- Virginia Moon begins with 1000 pounds of grain per batch
 - 600 pounds of Virginia Wheat
 - 300 pounds of Virginia Rye
 - 100 pounds of Malted Barley
- The grains are milled in-house and mashed in our 550 gallon Mash Tun
- The Mash is fermented for 4 to 5 days
- The Fermented Mash is twice distilled and then proofed to 90 Proof
- Unlike “moonshine” or corn whiskeys, Virginia Moon does not have a harsh taste

Our Story

KO Distilling was co-founded by college classmates and long-time friends Bill Karlson and John O'Mara in 2013. This new craft distillery in historic Manassas, VA is both a manufacturing plant and a destination. KO makes, stores, bottles and ships both high-quality clear (unaged) and brown (aged) distilled spirits. Their products will include gin, white whiskey, bourbon, rye whiskey, vodka, and other spirits. They are proud to be the 19th operating distillery in Virginia and one of roughly 1,000 (and growing) craft distilleries in the United States. They are also privileged to partner with many other small businesses, suppliers and farmers in the local area.
